

## Iris Identification Technology at Nine Zero Hotel, Boston, USA

Aditech Contactless Iris Recognition Technology is ideal in applications where there is a continuous flow of individuals within the premises. Whether they are guests or staff, access can be managed effectively.

### Maintaining hotel security and enhancing the VIP visitor experience.

The Nine Zero Hotel in Boston, one of Kimpton Hotels newest luxury, boutique properties, is the first hotel in the world to choose Iris Recognition and Identification technology. The solution offers both premium service and security to its VIPs and employees.

*“This could revolutionize hotel security and convenience. We determined that this is the best way to keep our hotel security updated and make the experience very pleasant. If you are a guest staying in our VIP suites and want the convenience and added security, as well as enjoy using the latest technology, than you can opt to enroll and use the iris solution to enter your room without the need for a key card. If you are an employee or the wine distributor who brings a delivery to the restaurant and you are not registered in the system, you cannot enter the back of the hotel.”*

**Jim Horsman, General Manager, Nine Zero Hotel**
