

Go Contactless with the IrisTime Biometric Time and Attendance Solution

Contact-free Biometric Time and Attendance solutions for the COVID-19 Era

Expect to see a move away from contact-based biometric time and attendance systems as we emerge from the COVID-19 pandemic. This comes at a time as biometric systems, many using fingerprint recognition, are gaining in popularity among public and private organisations.

Research studies have shown that viruses and germs can be passed from person to person by touching the same hard surface, like the ones on a fingerprint-based time clock. That led to members of the New York City Police Department, to protest the use of fingerprint time clocks. The NYPD has since suspended the used of fingerprint biometrics at its headquarters.

However, that doesn't mean organisations still can't enjoy the speed, accuracy and convenience of a biometric system. IrisTime is a new, dual biometric iris and facial recognition timeclock. It quickly authenticates employee identity and works with hundreds of existing Android- based time and attendance apps – along with other custom solutions yet to be designed. IrisTime helps process payroll and calculate benefits such as health, disability and vacation. And the contactless platform eliminates the fear of spreading disease.

Also, it virtually eliminates payroll fraud even in challenging time-keeping locations such as construction and agricultural sites, restaurants and healthcare facilities. Check out the IrisTime news release for more information on this timeclock for the modern workforce.

Aditech COVID-19 Compliant Solutions

As the COVID-19 pandemic changes our lives forever, so will the reliance on “Contactless” Access Control and Time and Attendance systems migrating from Keys, Cards and Codes to safer COVID-19 Compliant solutions employing Iris Recognition and Identification based biometric technology.

- No Contact
- No Keys
- No Cards
- No Codes
- No Coronavirus

Aditech and its partners have devised such solutions based on our range of reliable, accurate tried and tested devices, flexible solutions that can be applied to many sensitive applications and in most environments.

About Aditech Ltd.

Leaders in Iris Identification & Recognition

Aditech Ltd is a privately owned UK company formed in September 1995. At the formation of the company Iris Recognition was chosen to be the most accurate form of Biometric Identification. A strategic decision was then taken to focus on this technology as the basis for solutions being offered to the market.

In the many years of working with Iris Recognition Technology we have gained a wealth of experience following the many diverse projects that have been undertaken and so Aditech have become one of Europe's leading authorities on implementing any Iris Recognition system that is required.
